---

## Summary

Results-driven programmer with hands-on expertise in C, C++, HTML, CSS, and Data Structures & Algorithms. Adept at building efficient, scalable software solutions with a strong emphasis on algorithmic optimization and problem-solving. Committed to continuous learning and staying current with evolving technologies, I aim to contribute my technical skills and passion for innovation to dynamic software development and engineering projects.

---

## Education

**S.S. Jain Subodh PG College**                                       **August 2024 - 2027**
Computer Science                                          Bachelors in Computer Application

*Pursuing a Bachelor's in Computer Application (BCA) with a strong focus on Data Structures, Algorithms, and Software Development. Passionate about competitive programming, full-stack development, and problem-solving. Actively engaged in building projects and exploring new technologies.*

**K.P.S. Udaan**                                                                 **May 2024**
Physics, Chemistry, Mathematics (PCM)                    Senior Secondary (Grade XII)
90.2%

---

## Projects

**BankEase**                                                               **February 2025**
Bank Management System | C language
🔗 View Project

- Developed **BankEase**, a bank management system using **C programming** for efficient customer account handling. Implemented **file handling** for secure data storage, retrieval, and **account validation**.
- Integrated a **password-protected menu** to restrict unauthorized access and enhance security. Ensured **data integrity** and **error handling** for reliable banking operations.
- Focused on **validation checks** to maintain account uniqueness and prevent data inconsistencies.

C Programming, File Handling, Bank Management System, Data Security, Password Protection

## Languages

**English**                                                                      **Hindi**

---

## Skills

**C++**                                                    **Data Structures and Algorithms (DSA)**
Intermediate proficiency in C++ with          Intermediate Continuously improving problem-
knowledge of Object-Oriented Programming      solving skills through coding practice and
(OOP) and experience using the Standard       algorithm analysis.
Template Library (STL) for efficient coding.
                                              Problem-Solving, Algorithms, Data Structures
OOP, Problem-Solving, STL, DSA

**C Language**                                            **HTML**

**CSS**                                                   **SQL**

---

## Interests

**Reading Books, Newspaper**                              **Volleyball**

---

## Certifications

**Software Engineer Intern**    20 March 2025    **SQL (Basic)**         22 March 205
HackerRank                                       HackerRank
🔗 View Certificate                              🔗 View Certificate
