

NISHANT SHARMA

+91 6350435068 | business.nishant777@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Backend-focused Full-Stack Developer specializing in complex business logic and cloud infrastructure.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, SQL

Backend: Node.js, Express.js, Spring Boot, RESTful API Design

Frontend: Next.js, React, HTML/CSS, Shadcn, Ejs

Databases: PostgreSQL, MySQL, Prisma ORM, MongoDB

Cloud & DevOps: AWS (EC2, RDS, S3), Docker, GitHub Actions CI/CD, Nginx, WSL

EXPERIENCE

Software Engineer Intern | Pratham Software | March 2026 - June 2026

Java, Spring Boot, MySQL, React.js

- **Building** an end-to-end internal employee appraisal system, architecting a layered **Java backend** to handle multi-step review cycles and complex HR workflows.
- **Designing and integrating** RESTful APIs with a **Next.js frontend**, ensuring secure data flow and strict Role-Based Access Control (**RBAC**) for administrators, managers, and employees.

TECHNICAL PROJECTS

VizTube - Video Platform Backend with AI-Powered RAG | [GitHub](#) | [Live API](#)

Node.js, Express, PostgreSQL, Prisma, Docker, AWS, GitHub Actions, FastAPI

- Engineered a decoupled **FastAPI Python** microservice to asynchronously transcribe video audio via **OpenAI Whisper**, generate **vector** embeddings, and execute context-aware semantic queries using **pgvector** and **OpenRouter LLMs**.
- Developed a resilient **Node.js/Express** backend optimized for concurrent chunked media uploads to **Cloudinary**, managing complex relational data constraints and serverless connection pooling in **NeonDB** via **Prisma ORM**.
- Containerized the monorepo architecture with **Docker** Compose and deployments to **AWS EC2** via **GitHub Actions**, fortifying the application edge with **Nginx** SSL termination and **Cloudflare** proxying.

EchoInbox - Anonymous Messaging & AI-Assisted Response Platform | [GitHub](#) | [Live Site](#)

Next.js, PostgreSQL, Prisma ORM, NeonDB, NextAuth, Vercel AI SDK

- Architected a fully normalized **PostgreSQL** database schema using **Prisma ORM**, leveraging **NeonDB's** serverless connection pooling to prevent database connection exhaustion under **Next.js** Edge runtime loads.
- Engineered a custom **NextAuth** credentials flow, injecting **Zod**-validated state and **Resend** OTP verification flags directly into **JWT** payloads to eliminate redundant database queries during route protection.
- Integrated the **Vercel AI SDK** to deliver real-time streaming text responses for dynamic content generation, mitigating server overload and API abuse by implementing client-side **debouncing** for asynchronous database checks.

EDUCATION

Bachelor of Computer Applications | S.S. Jain Subodh PG College, Jaipur | 2024 - 2027

Grade 12 - PCM - 90.2% | KPS Udaan, Jaipur | 2024

CERTIFICATIONS

- **Microsoft GitHub Foundations** | [Verify](#)
- **Back End Development & APIs – FreeCodeCamp** | [Verify](#)
- **Problem Solving (Intermediate) – HackerRank** | [Verify](#)

ADDITIONAL

- **Twice** recommended by the **Indian Air Force** via 5-day SSB Interview, conference and medical tests.
- Solved **300+** algorithmic **problems** across platforms like [LeetCode](#), [CodeForces](#), and [HackerRank](#).
