

NISHANT SHARMA

Backend Engineer shipping production APIs, RAG/AI pipelines, and cloud infrastructure end-to-end

+91 6350435068 | business.nishant777@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

TECHNICAL SKILLS

Backend: Node.js, Express.js, FastAPI

Databases: PostgreSQL, Prisma ORM, pgvector

Cloud & DevOps: AWS (EC2, RDS, S3), Docker, GitHub Actions, CI/CD, Nginx, Linux, Cloudflare

Languages: Python, TypeScript, JavaScript, SQL

AI/ML: RAG Pipelines, Vector Search, Embeddings, LLM Integration, Whisper

Frontend: React.js, Next.js, Tailwind, Shadcn, HTML/CSS

Practices: Git, System Design, Unit Testing, Data Structures & Algorithms

EXPERIENCE

Software Engineer Intern | Pratham Software (PSI), Jaipur

Mar 2026 - June 2026

Java, Spring Boot, MySQL, React.js, TypeScript

- Developed the backend of an employee-appraisal platform, designing a layered **Spring Boot** service on **MySQL** with DTO-isolated **API** contracts and global exception handling, ensuring consistent error responses and maintainable, testable business logic across modules.
- Implemented **Spring Security 6** with **JWT**-based role access for HR, manager, and employee actors, exposing **REST** endpoints consumed by the team's **React + TypeScript** dashboard, and added input validation to guard against unauthorized cross-role requests.

TECHNICAL PROJECTS

VizTube - Video Platform Backend with AI-Powered RAG | [GitHub](#) | [Live API](#)

August 2025 - Present

TypeScript, Node.js, Express, PostgreSQL, pgvector, Prisma, Docker, AWS, FastAPI

- Engineered a **RAG** pipeline - a decoupled **FastAPI** microservice streams audio to **Groq** whisper-large-v3, embeds chunks locally with all-MiniLM-L6-v2, and answers through pgvector search with cited sources, keeping transcription and retrieval decoupled from the main Node.js API for independent scaling.
- Runs live on a 1 GB-RAM EC2 t3.micro by design - **pgvector** inside **Postgres** (no separate vector DB), cloud Whisper transcription - 3 **Docker** containers shipped via **GitHub Actions CI/CD** behind **Nginx** SSL and **Cloudflare**, keeping monthly infrastructure cost under budget for a solo-maintained side project.

Weave - Multi-Tenant PDF/CSV RAG System | [GitHub](#)

September 2026 - Present

Python, FastAPI, PostgreSQL, pgvector, Docker, React, TypeScript

- Architected a multi-tenant **RAG** platform for PDFs and CSVs - **dual-path ingestion routes** qualitative queries to **pgvector** semantic search and numeric queries to generated **SQL**, removing **LLM** arithmetic hallucination on tabular data, while isolating each tenant's documents and tables behind row-level access controls.
- Built a **Text-to-SQL** engine that infers types (currency, %, dates) from raw CSVs, provisions a typed **Postgres** table per file, and runs whitelisted SELECT/WITH-only queries with citations traced to exact page, row, or **SQL** statement, blocking destructive statements before they ever reach the database.

OPEN-SOURCE CONTRIBUTIONS

ed-donner/llm_engineering | 7k+ Stars | 2 PRs merged, 1,400+ lines | [Repo](#)

June 2026 - Present

- [#3631](#) Built an **LLM cost meter** patching the **OpenAI** client in place to track tokens and spend across 8 providers.
- [#3492](#) Shipped a local **RAG** course navigator (Gradio UI) - offline sentence-transformers embeddings, OpenRouter Q&A.

EDUCATION

Bachelor of Computer Applications | S.S. Jain Subodh PG College, Jaipur | **GPA: 8.3/10.0** | 2024 – 2027

Senior Secondary (Grade XII) | KPS Udaan, Jaipur | **90.2%** | 2024

CERTIFICATIONS

- Microsoft GitHub Foundations** | [Verify](#)
- Back End Development & APIs - FreeCodeCamp** | [Verify](#)

ACHIEVEMENTS

- Twice recommended by the Indian Air Force through its 5-day SSB (leadership & decision-making assessment).
- Solved 150+ **algorithmic** problems across [LeetCode](#), [Codeforces](#), and [HackerRank](#).
